

BEWARE OF BUSINESS EMAIL COMPROMISE

Business Email Compromise (BEC) is a cyberattack where attackers impersonate trusted individuals or organizations through emails to deceive victims into taking actions, such as transferring funds or sharing sensitive information.

RECOGNIZING A BEC ATTACK

- ✘ Poor spelling, grammar and punctuation**
BEC attempts often contain errors in language usage.
- ✘ Unusual formatting, appearance or domain**
Be cautious of messages that look different from the sender's typical style or come from random domains.
- ✘ Non-official email address**
Messages not originating from official email addresses or domains may indicate a BEC attack.
- ✘ Improper greeting or signature**
Unusual greetings, signatures or contact information could suggest phishing attempts and BEC attacks.

- ✘ Email-only communication**
If the sender avoids other channels of communication, it's suspicious.

- ✘ Urgency & rushed transactions**
BEC attackers create a sense of urgency to manipulate victims into acting hastily.

- ✘ Unusual fund requests**
Payment requests to uncommon addresses through unusual methods should be treated cautiously.
