

B BEYOND THE B BREACH

How Effective Is Your Incident Response Plan?

In the face of sophisticated threat actors, a foolproof incident response plan is your best defense.

Follow these steps to make your response plan effective:

-  **Preparation**
Identify critical assets, create a documented response policy and ensure all employees know their roles in safeguarding your digital fortress.
-  **Detection and identification**
Continually monitor your entire infrastructure to detect and identify threats before they escalate.
-  **Containment, eradication and recovery**
Isolate affected systems, eliminate the root cause of the incident and restore the impacted areas to their normal state.
-  **Post-incident analysis**
Document the lessons learned and implement proactive measures to prevent incident recurrence in the future.
-  **Continual improvement**
Revisit and update your plan regularly to keep it relevant and ensure its effectiveness.

**READY TO FORTIFY
YOUR DEFENSES?**
